PROFESSIONAL SUMMARY — Senior Data Analyst with 4+ years delivering analytics solutions across E-Commerce, EdTech, and Renewable Energy domains for fast-growing startups. Engineered end-to-end data automation, deployed real-time KPI dashboards, and built client-specific datasets with complete accuracy. Led cross-functional teams and collaborated with DevOps for scalable deployments while translating business needs into actionable insights that drive strategic decisions and optimize processes in dynamic environments.

SKILLS

Domains: E-Commerce, EdTech, Renewable Energy

Programming and Technology: Python, SQL, ETL, Selenium, API Integration, Automation

Data Engineering: AWS S3, RDS, ClickHouse, PostgreSQL, Docker, Database Migration, Airflow

Analytics Platforms: Apache Superset, Grafana, Redash, Power BI, BigQuery, Google Analytics

Workflow & Collaboration: Git, Jira, Bitrix24, Excel

Soft Skills: Leadership, Stakeholder Communication, Problem-Solving, Strategic Planning, Adaptability

EXPERIENCE

Senior Data Analyst & Engineer

July 2021 - Present

Delphi Analytics Pvt Ltd

- **Automation & Ingestion:** Engineered 90%+ manual effort reduction extracting data from 20+ E-Commerce platforms (Amazon/Flipkart/Myntra/Blinkit, Increff), EdTech (Canvas LMS, ClassPro), and Renewable Energy (IoT Loggers) using Selenium, APIs, FTP, AWS S3, Lambda, Airflow, Cron. Built complete ETL pipelines with Python data cleaning, raw/clean DataFrame processing, schema-validated updates to S3 and relational databases across 650+ tables, Airflow DAG monitoring, and automated alerting/notifications eliminating manual intervention.
- **ETL & Metrics Engineering:** Built custom SQL pipelines (PSQL, RDS, ClickHouse) consolidating base tables to client-specific datasets/incremental tables and raw data layers with table schema design, database migrations across multiple systems, multi-level dataset creation, KPI metric engineering, cron-scheduled updates, anomaly detection/alerting for 100% accurate cross-team analytics without dependencies.
- **Real-time Analytics:** Deployed 35+ client-specific KPI dashboards (Grafana, PowerBI, Superset, Redash, Metabase) across E-Commerce (Sales/Marketing/Inventory), EdTech (Student Performance/Admissions), Manufacturing (Plant Monitoring) featuring historical trend analysis, anomaly detection, problem highlights, and raw data drill-downs. Implemented daily MIS email reports, Slack/email alerting, row-level access controls enabling zero team dependency, real-time decision-making with 40-80% faster reporting and 30-50% cost savings.
- **Cloud/DevOps & Scale:** Collaborated with DevOps team on system deployments, server architecture design, tool integrations, Docker containerization, and system flow design ensuring web/app scalability across all client domains.
- **Leadership & Impact:** Led cross-functional teams across E-Commerce (3 brands: B2B/B2C skincare, clothing, FMCG - India/Dubai) and EdTech handling end-to-end project delivery. Mentored interns/new joiners on core tools/processes, managed client requirements with timely solutions, and trained EdTech stakeholders on student/parent analytics impact. Single-handedly automated operations ensuring smooth processes, provided data insights to both technical/non-technical teams, and optimized workflows delivering 26% faster project timelines across domains.

EDUCATION

Centre for Development of Advanced Computing, Pune (C-DAC)

2021

PG-DBDA Big Data Analysis

Grade : A

MIT Academy Of Engineering , Pune

2019

Bachelor of Electronics Engineering

Grade: A
