PROFESSIONAL SUMMARY — Data Engineer / Analytics Engineer with 5+ years of experience building end-to-end data pipelines, analytical data platforms, BI systems, and workflow automation across E-Commerce, EdTech, and Renewable Energy.

SKILLS

Programming and Technology: Python, SQL, ETL, Selenium, REST APIs, Automation

Data Engineering: AWS (Redshift, Lambda, S3, EventBridge, RDS), ClickHouse, PostgreSQL, Database Migration, Airflow

Analytics Platforms: Power BI, Grafana, Apache Superset, Metabase, Redash, BigQuery, GA4 Export

Workflow & Collaboration: Git, Jira, Bitrix24, Excel, Google Workspace APIs, Agile/Scrum Sprints

Soft Skills: On-Site Client Consulting, Technical Mentorship & Intern Training, Leadership, Problem-Solving

EXPERIENCE

Senior Data Analyst & Engineer

July 2021 - Present

Delphi Analytics Pvt Ltd

- **Automated Data Ingestion & Engineering:** Built end-to-end Python ETL pipelines and 120+ Apache Airflow DAGs across 20+ platforms (Amazon, Flipkart, Myntra, Blinkit, Canvas LMS, IoT loggers), eliminating manual effort by 90%+ and automating daily ingestion across 350+ total database tables across all clients with DAG alerting.
- **ETL & Data Warehousing:** Architected custom SQL pipelines and database migrations across PostgreSQL, ClickHouse, and AWS Redshift, establishing automated CSV schema validation, incremental data layers, and anomaly alerting for 100% accurate, dependency-free cross-team analytics.
- **Real-Time BI & Analytics Infrastructure:** Deployed 35+ client-specific KPI dashboards across Power BI, Grafana, Superset, Metabase, and Redash with Row-Level Security (RLS) and automated daily MIS email reports, achieving 40–80% faster reporting turnaround and 30–50% infrastructure cost savings.
- **Cloud & DevOps Collaboration:** Partnered with DevOps teams on Docker containerization, AWS S3/Lambda serverless architecture, and system flow design, ensuring high web/app scalability.
- **Leadership & Cross-Functional Impact:** Led end-to-end data delivery across 6 clients (3 E-Commerce, 2 EdTech, 1 Renewable Energy), mentored interns and new joiners, managed client requirements in Jira and Bitrix24 under strict SLAs, and optimized workflows delivering projects 26% faster.

KEY PROJECTS

Multi-Platform E-Commerce Data Engineering & Analytics Platform 🔄

E-Commerce / D2C Domain

Tech Stack: Python, SQL, Airflow, ClickHouse, AWS S3, Power BI, Superset, Grafana

- **Multi-Client Data Platform & Warehousing:** Built an end-to-end multi-client e-commerce data platform ingesting Sales, Inventory, Marketing, Catalog, Tax, and Order data across 15+ marketplaces and D2C channels using APIs, Selenium, Python ETL, Airflow, and AWS S3; standardized and loaded data into 300+ ClickHouse tables with automated reconciliation, freshness monitoring, and alerting.
- **Unified Analytics, BI Dashboards & Automation:** Built unified Sales, Inventory, and Marketing analytics at child-SKU level covering True ADS, DOH, stock velocity, ROAS, CAC, customer acquisition, and repeat purchases; delivered 28 Power BI/Superset dashboards and automated MIS reporting, saving 80+ hours/month and enabling Sales, Marketing, Inventory, and Finance teams to make data-driven decisions.

Automated Academic Analytics & Student Performance Platform 🔄

EdTech Domain

Tech Stack: Python, PostgreSQL, Airflow, Superset, Grafana, Playwright

- **Ingestion, Warehousing & OMR Scoring Engine:** Built Airflow DAGs and Playwright headless scrapers across 7 sources (Canvas LMS, ClassPro non-API CRM, Google Drive drops), modeling a PostgreSQL warehouse with 3-way attendance reconciliation (RFID + class registers + IoT sensors) and an OMR bubble-sheet evaluation engine that cut test turnaround from 2 days to 30 minutes (99%+ accuracy) and eliminated 60–80 hours/week of manual collation.
- **Multi-Audience BI & Printable PDF Reporting:** Deployed self-serve Superset dashboards (17 tabs) and Grafana PTM portals for Students, Faculty, and Parents, paired with an automated PDF engine producing printable test scorecards, cumulative test-series reports (TPR/MSR), and ReportLab SWOT practice papers for all 2500+ students.

EDUCATION AND CERTIFICATION

Centre for Development of Advanced Computing, Pune (C-DAC) — PG-DBDA in Big Data Analytics

2021

MIT Academy Of Engineering, Pune — Bachelor of Electronics Engineering

2019
